

# PTFE

CHEMOURS | TEFLON®

PTFE (PolyTetraFluoroEthylene) has very unique properties, it is normally applied to components where a non-stick, dry lubricant or low friction coating is required. The mechanical toughness, electrical and low friction properties makes it preferred coating material for many of the applications.

## FEATURES

- ♦ Non stick to virtually everything.
- ♦ Extremely low coefficient of friction
- ♦ Good chemical resistance
- ♦ Food contact acceptable
- ♦ Operating temperature upto 260 °C

## TYPICAL COMPONENTS ARE

- ♦ Textile Cylinder
- ♦ Pin bars
- ♦ Baking Trays
- ♦ Valve components
- ♦ Sealing heaters
- ♦ Bakery Utensils
- ♦ Guide rolls
- ♦ Domestic Cookware
- ♦ Fasteners
- ♦ Shower components
- ♦ Medical equipments
- ♦ Pizza Pans
